# Inter-University Research Institute Corporations National Institutes for the Humanities (NIHU)

### http://www.nihu.jp/e/

NIHU is one of the four Inter-University Research Institute Corporations. It consists of six Inter-University Research Institutes involved in research in humanities. While each of the institutes is deeply involved in foundational research in their core field within Japan and internationally, the six institutes interact in a complementary fashion transcending the frameworks of previous scholarship. They also cooperate with research institutes in Japan and other countries in their attempt to identify and solve issues in contemporary society. NIHU promotes research that advances the human sciences as it also enriches human life.

#### Promotion of Research and Public Information Activities

In 2016, NIHU established two centers, the Center for Transdisciplinary Innovation and the Center for Information & Public Relations. The six member institutes, each serving as a center for nationwide research exchange, are accessible to the national research community, as they engage in multifaceted joint research projects, publish information to the world proactively, and promote and enhance the development of the next generation of scholars.

#### Center for Transdisciplinary Innovation (CTI)

The CTI promotes collaboration and cooperation within and between the six institutes, linking them to domestic and international universities, research institutes and local communities. It promotes the NIHU Transdisciplinary Project, an organizational joint research project that identifies contemporary issues, with the aim of creating a new value system for the human sciences.
