

Final evaluation at the end of FR

Title of the Project	Human Activities in Northeastern Asia and their Impact on Biological Productivity in North Pacific Ocean
Project Leader	SHIRAIWA Takayuki
General advice and comments of PEC: This is an excellent project, highly compatible with the purposes of RIHN's founding and research. It has achieved most of the original goals laid out in its research plan and it is reasonably cost effective. PEC is especially impressed by the establishment of the Amur-Okhotsk Consortium.
