

Interim FR evaluation (FR2)

Title of the Project	Collapse and Restoration of Ecosystem Networks with Human Activity
Project Leader	YAMAMURA Norio
General advice and comments of PEC: PEC finds this to be an important and difficult research area and project, and would draw attention to several points as it progresses in the next years. Most significantly, the project leader should concentrate on simplifying his model of ecosystem change so that it can be communicated to, and utilized by, a non-specialist audience.
