

# **International workshop for co-designing local wisdom of land and water management for IWRM**

Date: 9:30 – 18:00, March 28th, 2013

Venue: Convention Hall, Research Institute for Humanity and Nature

Co-hosted by JSPS Grants-in Aid for Scientific Research Project Number: 24248041

## **▶ Objectives of the workshop**

This workshop aims at sharing outcomes and information on other case study areas with each other and promoting interactions for co-creation of wisdom on land and water management, based on design science and futurability. Its detailed goals are as follows;

- a) To deepen understandings on the grand design of our project among all the members; not only core members but other project members including overseas counterparts.
- b) To advance from chapter-oriented research so far toward collaboration among all the researchers on the methodological basis.
- c) To identify indices necessary for formulating “water consilience” in thematic session.
