## About the publisher

Alpha Research has been in information business for about 10 years now. Our first publication-**Thai Trade Monitor** - was a reference book on export and import statistics. In 1990, **Thailand in Figures** was published. It was the very first comprehensive reference book on Thailand's socio-economic statistics at the national and provincial level. It was widely subscribed by university libraries, research institutes, consulting firms and leading companies in Thailand and abroad.

In 1994, we introduced **Pocket Thailand in Figures**, the first in our pocket series. As we have gained more experiences in information providing business, our publications have covered more areas such as health and petroleum statistics. Now that the world is going digital, we have established an associated company, Alpha Info, to be responsible for electronic publishing and web database creation.
