

# RIHN Seminar Series

## *Transitions to agroecological food systems*

# MIGUEL ALTIERI

Emeritus Professor, University of California, Berkeley  
Invited Scholar, Research Institute for Humanity and Nature

**May 8, 14:00** *Agroecology and the transition to sustainable, resilient food systems*

**June 5, 15:00** *Agroecology: a systemic perspective on the links between agriculture, biodiversity, and health*

**@ RIHN Lecture Hall, Language: English**

Professor Altieri is a world leading scientist of agriculture and sustainability. He played an integral role in the establishment of the field of agroecology, which has been recognized by the FAO as “the basis for evolving food systems that are equally strong in environmental, economic, social and agronomic dimensions.”

Please RSVP to FEAST Secretariat  
feast[a]chikyu.ac.jp ([a]⇒@)  
If you are interested in attending!

Join us at the Research Institute for Humanity and Nature in Kyoto, Japan for a series of two lectures on transitions to agroecological food systems.
