

## **EREC Comments**

\*This evaluation takes place in the transition from Feasibility Study to Full Research, i.e. Selection of Full Research project.

FS Title	Coproduction Research with Local Practice and Science for Sustainable and Fair Hunting of Forest Wildlife
Proposed FR Title	Fair and Sustainable Hunting Management through Dialogues between Local Knowledge and Science
Leader of the Proposed FR (Principal Investigator of FS)	HONGO Shun
Proposed Project Period	5 years Full Research
Affiliated Program	Global Environmental Culture (MATSUDA Motoji)

### **General advice and comments of the EREC**

The committee highly recognizes the effort to solve real world problems in engaging and co-creating with the communities. The project also addresses real world problems, with relevance to many other global issues including nature conservation and external demand for bush meat.

The proposal presents conditions for behavioral change, but the study could further develop a strategy that leads to real change. The strategy could be then embedded into local, national, and global policy contexts.
