

## Penultimate year FR Evaluation

<b>Title of the Project</b>	<b>Environmental Change and the Indus Civilization</b>
<b>Project Leader</b>	<b>OSADA Toshiki</b>
<b>General advice and comments of PEC:</b> This project has come with valuable and significant findings on environmental change and the Indus Civilization. The concept and research structure initiated in the beginning has been successfully achieved in line with RIHN's mission and understanding so far. From now on, the project members might rather focus on analyzing these findings in a more integrative and interdisciplinary way so that they will be successfully utilized to further understand the historical trajectory of the Indus civilization. Since the findings are important not only for scientists but also for public audience, the project is expected to extend its publications.
