

## Evaluation of transition of Initiative-based FS to FR

<b>Title of the Project</b>	<b>Developing Resource Chain Analysis: Toward Re-embedding Human Society into Nature</b>
<b>Project Leader</b>	<b>TOMITA Shinsuke</b>
<b>General advice and comments of PEC:</b> <p>This proposal seems to be appealing in terms of its philosophical viewpoint but difficult to understand the objective and methodologies of the project in terms of its academic focus. The picture designed in this project is not clear and needs to be re-framed with a more realistic scope. A thorough literature review and preliminary survey on the relevant previous research are necessary. There should also be a serious interdisciplinary research scope in line with RIHN's vision. Integrative and comprehensive research framework with holistic outputs that reflect RIHN's objectives is necessary for better development of the proposal. For these reasons, PEC would not recommend promoting this proposal to a full research project.</p>
